Remarks

In the FLETCHER Class, the U. S. Navy definitely abandoned the medium-sized destroyer, and adopted new standards for size, sea-keeping ability and sustained speed. A new basic destroyer design was introduced, to which all succeeding classes have been built. Salient features of this design are: increased beam, reversion to the flush-deck hull, but with a conventional destroyer stern, and the retention of the BENSON's boiler and engine room arrangement. The FLETCHER's have proven themselves one of the most successful destroyer classes ever built for the Navy.

War losses include: CHEVALIER (DD 451), STRONG (DD 467), DEHAVEN (DD 469), PRINGLE (DD 477), BROWNSON (DD 518), ABNER READ (DD 526), BUSH (DD 529), HOEL (DD 533), JOHNSTON (DD 557), HALLIGAN (DD 584), COLHOUN (DD 801), and LITTLE (DD 803).
